However, there can be no assurance that such law will not change and that there will never be any cross-Cell liability risk. Further, the protected cell provisions of the Companies Law have not yet been tested in the courts of the United Kingdom or elsewhere and such jurisdictions may not be prepared to accept such segregation.</p> <p>In order to minimise this risk, service providers to the Company will generally be required to agree that their fees will be paid solely from the assets of the particular Cell to which the services relate and each Shareholder will be required to agree that any liability will be satisfied only out of assets of the particular Cell to which the liability relates. However, a court could determine that such agreements are not enforceable.</p> <p>Under the Companies Law it is possible for the Company to enter into a recourse agreement which provides for recourse to core assets or the assets of one or more cells however, the Directors do not intend for any such recourse agreements to be put in place.</p>

#### Section D – Risks

Element	Description	
<b>D.1 (B.33)</b>	Key Risks regarding the Company and the Guarantor	<p>Investment in the Cell Shares issued by the Company in respect of the Protected Cell is subject to certain risk factors. Investors should carefully consider both the risks generally associated with investing in the Company and the risks associated with investing in the Cell Shares.</p> <p>The risks listed in the Prospectus are those risks that the Company, as at the date of this Summary, is aware of and considers to be material and should not be considered to be an exhaustive list of the risks which potential investors should consider before investing in the Cell Shares. Risks that the Company considers to be immaterial or of which it is not aware have not been included in the Prospectus and potential investors should be aware that an investment in the Cell Shares may be exposed to other risks not considered material by the Company based on information currently available to it or which it is not currently able to anticipate. Investors should read the detailed information set out elsewhere in the Prospectus and reach their own views prior to making any investment decision.</p> <p>Key risks listed in the Prospectus generally associated with investing in the Company include:</p>

Element	Description
	<p><i>The Company:</i></p> <p>The assets of each Cell are subject to contractual segregation and statutory segregation under Guernsey law. However, there can be no assurance that such law will not change or that jurisdictions other than Guernsey will be prepared to accept that the assets of one Cell are not available to creditors to satisfy the liabilities of any other Cell or the Company as a whole. The protected cell provisions in the Companies Law have not yet been tested in the courts of the United Kingdom or elsewhere.</p> <p>There can be no assurance that the Company's full investment objective in respect of the Protected Cell will be achieved. The investments of the Company are subject to normal market fluctuations and other risks inherent in investing in investments linked to indices and there can be no assurance that any appreciation in value will occur.</p> <p>The Company's only investments for the Protected Cell will be in the Plan Investments and there may be no counterparty risk diversification. The obligations of the Investment Counterparty under the Plan Investments will not be collateralised.</p> <p>Any change in the Company's tax status, or in taxation legislation or in the interpretation or application of tax legislation, could affect the value of the investments held by the Protected Cell, the amount paid to the Company under the Plan Investments, the Company's ability to achieve the stated investment objective of the Protected Cell, the amounts guaranteed or payable under the Cell Guarantee and/or alter the post-tax returns to Cell Shareholders.</p> <p>The Company reserves the right to limit the number of Cell Shares available under the offer. The Company may also cancel the offer by compulsorily redeeming any Cell Shares in issue.</p> <p>ANTS may have potential conflicts between its roles as Determination Agent, Investment Counterparty, Investment Manager and market maker for the Cell Shares (the <b>Market Maker</b>). ANTS shall use its reasonable endeavours to ensure any such conflicts of interest are resolved fairly.</p> <p>The Company intends to place any subscription proceeds it receives prior to the Investment Date on deposit in its bank account held in respect of the Protected Cell with RBS. If RBS (or any other bank with which the aggregate subscription proceeds from the offer of Cell Shares were to be deposited) were to be wound-up or otherwise suffer an insolvency-related event between the start of the Offer Period and the date of investment in the Plan Investments, the Plan Investments will not become effective and the Company may lose some or all of its subscription proceeds in which case, Cell Shareholders may lose some or all of their investment.</p> <p><i>The Guarantor:</i></p> <p>The Guaranteed Return does not extend to the full amount of the Investment Return in respect of the Cell Shares and, in particular, does not</p>

Element	Description	
		<p>cover the full amount of the Investment Return if the Performance Return, rather than the Fixed Return is payable.</p> <p>Performance of the Cell Guarantee is dependent on the continued solvency of the Guarantor and SUK.</p> <p>Cell shareholders will receive an amount at least equal to the Guaranteed Return in respect of their Cell Shares held on the Maturity Date only if either the obligations of the Investment Counterparty under the Plan Investments are satisfied or the Guarantor satisfies its obligations under the Cell Guarantee on the Maturity Date if the Company, acting in respect of the Protected Cell, fails to pay an amount at least equal to the Guaranteed Return to Cell Shareholders in respect of their Cell Shares held until the Maturity Date and, if necessary, SUK satisfies its obligations to the Guarantor under the Conditional Share Subscription Agreement.</p> <p>If the conditions to the effectiveness of the Plan Investments are not satisfied, the Company will compulsorily redeem all the Cell Shares and investors will receive back all subscription proceeds held (plus any net interest earned thereon), save where the Company is unable to recover some or all of its subscription proceeds as explained above. The Cell Guarantee will not apply to any such redemption of the Cell Shares.</p> <p>The obligations of the Guarantor to make payments under the Cell Guarantee will be limited to the extent that it is illegal for such payments to be made to Cell Shareholders or if there is a change of tax legislation at any time resulting in a withholding tax or other tax deduction affecting payments or proceeds under any Plan Investment or the redemption of the Cell Shares. Payments under the Cell Guarantee will also be made net of any withholding tax or other tax deduction.</p>
<b>D.3</b>	Key risks regarding the Shares	<p>Key risks listed in the prospectus associated with investing in the Cell Shares include:</p> <p>If SUK, ANTS or the Guarantor were to be wound-up or otherwise suffer an insolvency-related event at any time, Cell Shareholders may lose some or all of their investment.</p> <p>If the obligations of the Investment Counterparty under the Plan Investments are not satisfied and the Guarantor were to default under the Cell Guarantee (whether as a result of insolvency or otherwise), Cell Shareholders could lose some or all of their investment.</p> <p>The Investment Return payable will depend on the level of the Index on specific dates. Accordingly, prospective investors in the Cell Shares should ensure that they fully understand how the performance of the Index may affect an investment in the Cell Shares. The level of the Index may go down as well as up. Furthermore, the level of the Index may not reflect its performance in any prior period. In recent years the performance of the Index has been volatile. Volatility could have a positive or negative effect on the Investment Return. There can be no assurance as to the future performance of the Index.</p> <p>The Performance Return under the Cell Shares is subject to averaging. The</p>

Element	Description	
		<p>use of an average to calculate the Final Index Level will smooth the performance of the Index and shelter an investment made by an investor from any sudden fluctuations. Potential investors should be aware that if the Index rises continually through the final six months of the Investment Term, the use of an average could mean the return is less than it might otherwise have been.</p> <p>The Directors do not anticipate that an active secondary market will develop in the Cell Shares. Investors should be aware that liquidity may be of a limited nature.</p> <p>Investment in any Cell Shares should be viewed as an investment for the full Investment Term of such Shares and there is no assurance that investors will be able to sell their Cell Shares prior to the Maturity Date or as to the price at which any sale may be possible.</p> <p>Any Cell Shareholder who disposes of his or her Cell Shares prior to their Maturity Date will not be covered by the Cell Guarantee in respect of such disposal and may receive back less than the amount which he or she invested in the Cell Shares.</p>
